

Congress,

I am not currently a XM subscriber, but I enjoy many freedoms while traveling freely across eastern states. Radio stations come in and out. But if someone could reroute thier travel to miss a road problem a state away, how much money, time and polution could be saved with a satelite traffic and weather chnnel. And a charged service that helps boosted our economy. Case in point, the fire on I-95 in CT. A person traveling north on I-95 in Nj, could reroute thier trip not to contiue on I-95 though NYC and the begining of CT, The first 27 miles. But could take I-80 to the Garden State Parkway, I-287 /87, Saw Mill Parkway, I-684, To I-84 in CT. Three different local markets.

Thank You,
Bryan
